

CARROLL TREE SERVICE — INC. —

Why choose Carroll Tree Service to manage the trees of your estate, institution, or commercial property?

Trees can provide beauty, tranquility, and privacy. They can enhance architectural features or guide pedestrian traffic. Trees can moderate the temperature of structures, reduce energy costs, and increase property values. If not managed correctly, they can become unsightly and hazardous.

If you are charged with maintaining the safety and beauty of an environment that is open to the public, it is vital that the trees in that environment be monitored and cared for by an ISA Certified Arborist. Carroll Tree Service arborists will help ***manage your liability*** through regular monitoring and hazard mitigation. In many instances trees show signs and symptoms of decline prior to failure. Maintaining a diligent care program will minimize the potential for costly tree-related accidents.

Trees are living assets that require professional care. Do not risk the costs that will arise if they are neglected.

Carroll Tree Service is an ***accredited*** company with an authentic safety program and credentialed field employees. We will ensure that a Certified Arborist is directly involved with the care of your property.

In addition to traditional tree care services, Carroll Tree Service offers:

- Emergency Response***
- Plant Health Care monitoring and Integrated Pest Management***
- Hazard assessment and mitigation***
- Construction-related Tree Preservation services***

From the National Mall in Washington, DC to the grounds at the Johns Hopkins University, Carroll Tree Service has been managing the tree populations of prominent institutions and multi-acre estates since 1950. It's our specialty. We understand the needs and concerns of facilities managers, course superintendents, and estate owners.

*Year after year you can **depend** on us for:*

- Professional appearance and conduct***
- Unparalleled attention to detail***
- Dedication to property protection***
- Deference to guests, members, students and staff***

Carroll Tree Service has a comprehensive fleet of equipment virtually unmatched in the region. We have highly skilled operators and the structural flexibility to provide the ***swift mobilization*** of resources. In short – we will respond quick and strong until all of your tree care needs have been met.
